# POCKET TRIPS GUIDE

---

Pocket Trips is an award-winning web-based mobile authoring platform that empowers anyone to create, design and publish their own interactive trails anywhere in the world. With this technology, the teachers at Waterway Primary School facilitated our Primary Two students in a nature trail project on the flora and fauna along the Punggol Waterway Park. The Nature Society Singapore conducted a learning journey for our students to share information on the diverse animals and plants found just behind our school. The students then researched and curated the content presented in this mobile learning app guided by teachers. We hope that you will enjoy this content and learn to appreciate the rich and diverse habitat as you explore the Punggol Waterway Park and the Lorong Halus wetlands.

Please follow our detailed instructions to download the Pocket Trips app and the content presented to you by our Primary Two students of Waterway Primary School.

## Downloading the app

Download “**Pocket Trips**” app from the Apple App Store or Google Play Store.

1. Search for “**Pocket Trips**” in

App Store

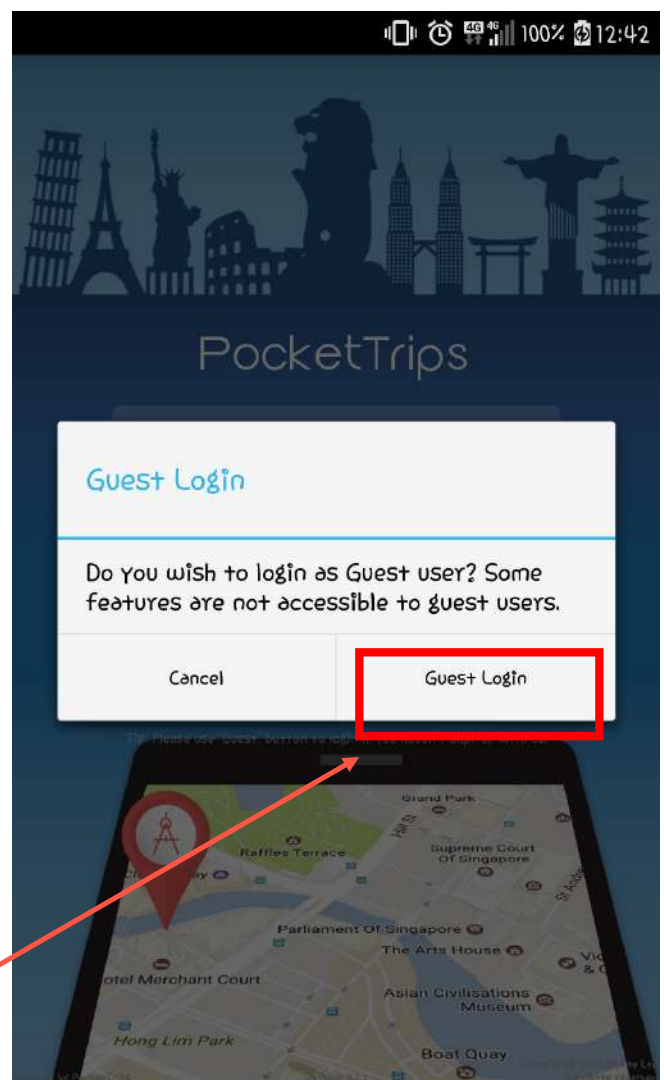

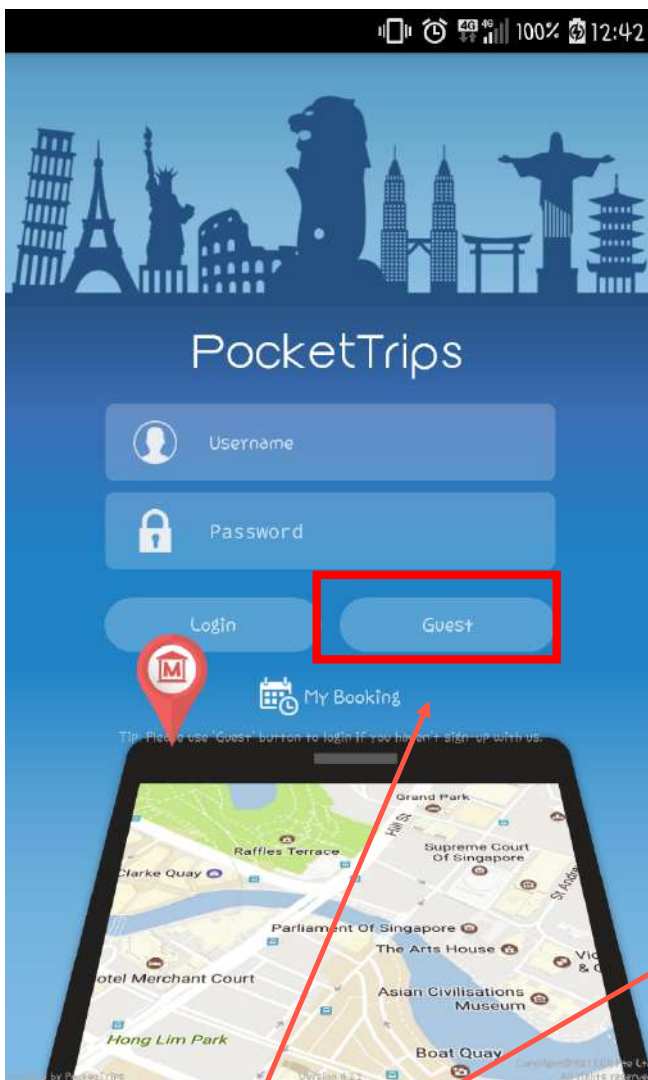

Google play

2. Download and install the app.
3. Run the app after installation or run it from the apps screen in the phone.

## Getting Started

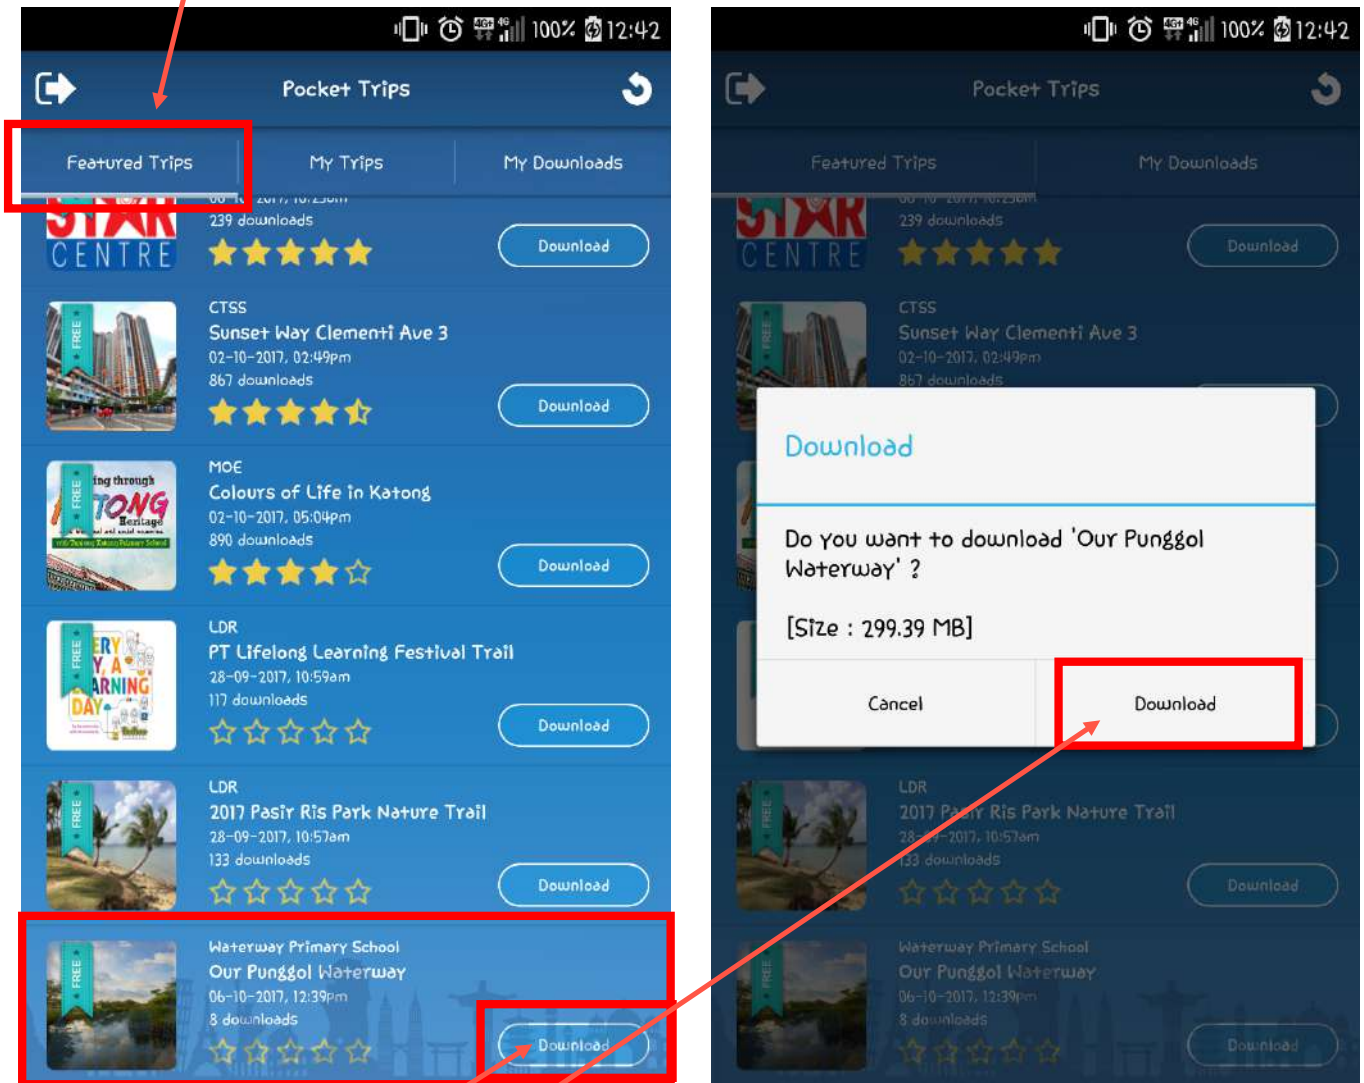

Launch the app.

Sign in as Guest.

## Downloading the Trip

Search for “Our Punggol Waterway” trip by Waterway Primary School under the Featured Trips tab.

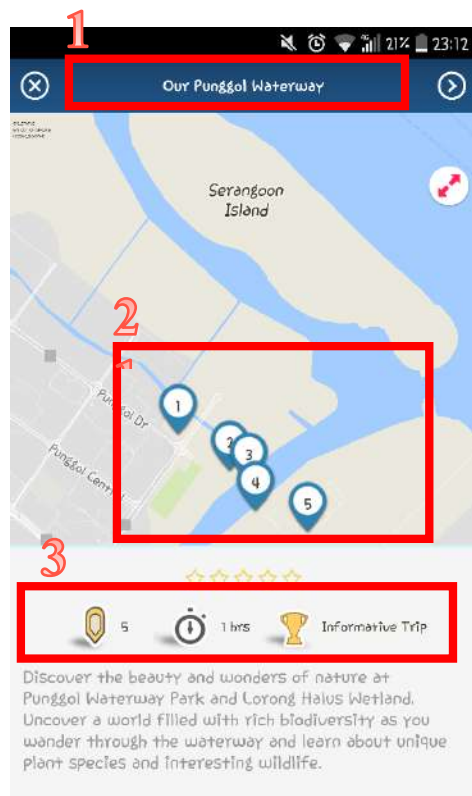

Download the trip.

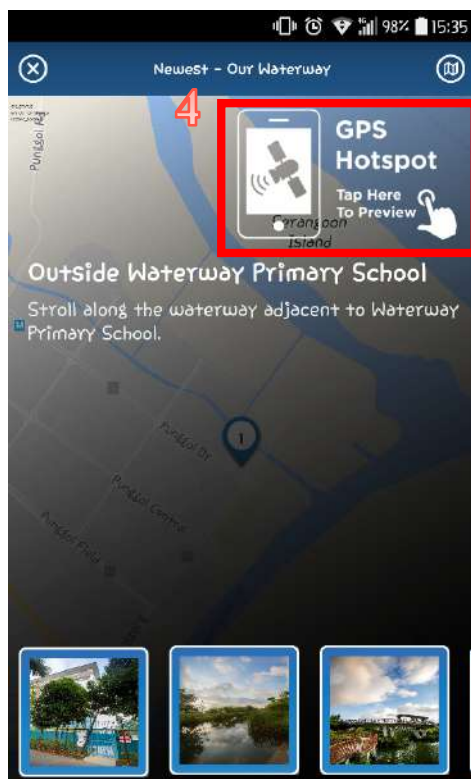

The trip will consume around 300mb of data, users are advised to download the trip using WIFI connection.

## Using the Trail

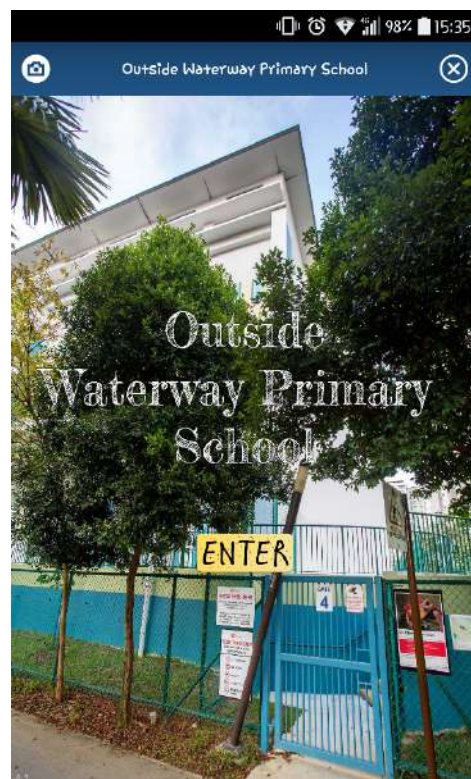

This is a GPS trail, content will automatically be activated when users walk into the geo-fenced zone

Trail Description page

Hotspots menu

Hotspot's welcome page

1. Title of Trip.
2. Location of Hotspots.
